

MCKIA ARABIA

ELEVATING EVERY PROJECT

PROFESSIONAL ACCESS SOLUTIONS FOR
COMPLEX ENVIRONMENTS

ABOUT US

We are a specialised working at height, rope access and consulting services company with extensive industry experience delivering advanced access solutions for complex and demanding environments.

Our team combines technical expertise with an unwavering commitment to safety, enabling us to execute projects where traditional access methods for example, scaffolding, ladders and MEWPS are impractical, or cost-prohibitive.

Our rope access teams are professionally trained and IRATA-qualified, ensuring all work is performed in accordance with internationally recognised rope access standards and strict safety procedures. This expertise allows us to operate efficiently in high-risk and difficult-to-reach environments while maintaining the highest levels of professionalism and operational control.

Working across a wide range of industries, we deliver efficient and professional solutions that minimise operational disruption while maximising safety, productivity, and long-term value.

Driven by a culture of quality and continuous improvement, we operate in alignment with ISO principles, maintaining compliant systems and procedures that support consistent service delivery, operational excellence, safety and client confidence.

Every project is approached with a strong focus on planning, risk management, and adherence to industry best practices.

Our Services

Rope Access Solutions

- Structural inspections
- Corrosion Protection
- Geotechnical services
- High-level cleaning
- Steel installations
- Confined space operations
- Shutdown support
- Rigging and lifting support
- Industrial painting and coatings
- Mechanical access support

Consulting Services

- Rope access project planning
- Safety compliance consulting
- Method statement development
- Rescue planning
- Risk assessments
- Operational efficiency consulting
- Asset integrity support
- Technical advisory services
- Maintenance solutions

SERVICES EXPLAINED

STRUCTURAL INSPECTIONS

We inspect buildings, industrial facilities, and civil structures to identify cracking, movement, wear, and overloading. Based on our findings, we provide a clear report with practical recommendations for repair, strengthening, or monitoring.

MAINTENANCE AND REPAIRS

We provide planned maintenance and repairs for assets affected by corrosion, wear, or damage, helping to maintain safe and reliable operations with minimal disruption.

GEOTECHNICAL SERVICES

We stabilise rock faces, open-pit mine highwalls, and embankments using loose-rock removal, engineered support systems, drainage, and erosion control. Together with ongoing maintenance, these measures reduce rockfall and slope-instability risks.

HIGH-LEVEL CLEANING

We provide safe cleaning services for roofs, structural steel, silos, conveyors, façades, and other hard-to-reach areas. Each project is carefully planned to maintain site cleanliness while minimising operational disruption.

STEEL INSTALLATION

We install and modify platforms, walkways, handrails, ladders, supports, and structural steelwork. Each installation is completed to specification, ensuring correct alignment, secure connections, and safe access.

SERVICES EXPLAINED

CONFINED SPACE OPERATIONS

We undertake inspection, cleaning, maintenance, and repair work in tanks, vessels, silos, ducts, and other confined spaces. To ensure safe execution, every entry is managed under controlled procedures with appropriate emergency support.

SHUTDOWN SUPPORT

We provide coordinated support during planned shutdowns, including inspections, cleaning, repairs, installations, and access services. Through effective planning, we promote safe execution, controlled downtime, and an efficient return to operation.

RIGGING AND LIFTING SUPPORT

We provide rigging and lifting support for the controlled movement and positioning of equipment, steelwork, and components. Competent personnel carefully plan and carry out every lift using inspected equipment and established procedures.

CORROSION PROTECTION: INDUSTRIAL PAINTING AND COATINGS

We apply industrial paints and protective coatings to steel, concrete, and equipment exposed to corrosion, weather, chemicals, and wear. Supported by thorough surface preparation and controlled application, these systems provide durable, long-term protection.

MECHANICAL ACCESS SUPPORT

We provide safe access solutions for elevated, restricted, and hard-to-reach areas, enabling inspection, servicing, installation, and repair activities to be completed efficiently.

INDUSTRIES WE SERVE

Our specialised rope access services are tailored to meet the demanding requirements of industrial, mining, and infrastructure environments. From shutdown support, inspections, and maintenance in heavy industrial operations to specialised access solutions for complex structural and high-risk environments, we deliver safe, efficient services where traditional access methods are impractical, disruptive, or cost-prohibitive.

Our experienced IRATA-qualified teams understand the operational pressures, technical challenges, and compliance requirements unique to each sector. By combining technical expertise with disciplined project execution, we help clients minimise downtime, improve efficiency, and maintain critical infrastructure safely and effectively across every project.

SAFETY COMMITMENT

Safety is at the core of everything we do. Every project begins with comprehensive risk assessments, method statements, and detailed safety planning to ensure all hazards are identified and controlled before work commences.

Our teams are trained to the highest industry standards, including internationally recognised IRATA rope access certification, with rigorous equipment inspection protocols and strict compliance with all applicable regulatory frameworks.

We operate in accordance with the principles of ISO 45001:2018, embedding proactive health and safety management into every aspect of our operations.

We believe that disciplined planning, continuous risk management, and safe execution are the foundation of successful project delivery — enabling us to complete complex access solutions efficiently, professionally, and without compromise.

Tailored Solutions

WHY CHOOSE US

Our team of experienced professionals is committed to delivering safe, efficient rope access solutions that align with your operational goals and project expectations. We don't simply work for our clients — we work alongside them as a trusted extension of their team, building strong partnerships focused on shared success.

By combining technical expertise with dependable project management, we provide tailored solutions that minimise costs, reduce disruption, and maximise long-term value. From initial planning through to final completion, we take the time to understand your unique requirements, priorities, and challenges, ensuring every project is executed with precision, transparency, and care.

We measure our success by the success of our clients, consistently delivering quality outcomes on time, on budget, and to the highest professional and safety standards.
